

ICON by STARCK

FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful chairs that last through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

When I close my eyes and think of a chair,
this is the chair I see – it's an Icon ...

ICON by STARCK

Icon is a stacking chair cousin to the famous Starck-designed Hudson chair. It has been used in hotels, bars and restaurants worldwide, as well as training centers, meeting areas and schools. Starck describes Icon as "the chair I see when I close my eyes." You can expect your Icon chair to last 150 years or longer.
