LAMP NOT SUPPLIED	
CERTIFICATIONS	CE UK

- As each marbled glass shade is hand-blown and the colour is carefully folded into the glass, natural variations in colour and pattern will occur. No two shades are exactly alike, and these variations can be significant. Air bubbles may also be present, as they are a natural and inherent part of the glass folding and blowing process.
- The Neo ceiling light feature a pivoting mechanism that allows the glass shade to be angled.
- The pole and rose has a white textured powder coat finish, creating a tactile touch point.
