SISTEMA FLOOR LAMP

The Sistema floor lamp is part of the new collection made by 6:AM Glassworks and NM3 and features the characteristic textured glass tiles, reinterpreting a classic 1930s Italian lighting design, a stainless steel cage and the Bardiglio or Verde Alpi Magnifico Carrara marble base.

This kind of marble gives the structure an understated and essential aesthetic, a one-of-a-kind monolith with its gray tones. An integrated LED system makes the light homogeneous and diffused.

Its unique pierced back allows light to diffuse on both sides, creating a mesmerizing ambient lighting effect.
