STINE KEINICKE PRODUCT LIST

BOLD KITCHEN

Bold Kitchen is a collection of plates and bowls, designed for food storage, preparation and serving.

The shape of the bold edge creates a tactile and comfortable grip, which makes it functional and enjoyable to use. Bold Kitchen graciously fulfills both needs in the kitchen and dining room. Very few products are flexible enough to transition from cooking, to dining, to storing food without friction. This collection embraces tactility, timeless design, and good ergonomics in the kitchen. The plates also function as lids for the bowls, which allows simple tableware to transform into food storage for the fridge.

The collection is made out of hand spun stainless steel, a material chosen for its strength and sterility, which is very well suited for the practical requirements of cooking. The material also gives the pieces a tactile smooth touch and light reflective surface, which sits beautifully in a table setting.
