Cooling me softly with his fan... 🎵

COLLECTION 2023

Beautiful Noiseless Ecological Green Handmade

We believe this is the best way to stay comfortable all year long, both in winter and summer, while avoiding air conditioning and respecting the planet.

Made with
pride, love and
passion.

Our philosophy

We design and build beautiful fans with pride, love, and passion. We love what we do.

Over time, we have acquired an unbeatable expertise in manufacturing high-quality fans. Our family factory has been manufacturing fans for three generations.

Our products are not mass-produced, they are meticulously handcrafted, one by one.

We use raw recycled aluminum sourced from various old objects.

Caring for our planet and being environmentally conscious are at the core of our values. We strive to be as eco-friendly as possible by optimizing each stage of production and distribution.

When conceptualizing our products, we are committed to selecting only natural materials such as raw recycled aluminum, teak wood, oak wood, and beech wood.

About us

Projects

We offer an amazing possibility for architects and designers to customize each of our fans to suit the exact requirements of your project.

We are fortunate to have excellent manufacturing facilities that enable us to fulfill most of your wishes. Contact us to share more information about your project, and we'll strive to meet your requirements.

Shipping infos

International shipping within 48 hours.

Fedex is our logistics partner and will ensure a fast and secure delivery right to your place.

How to order?

1) Send us an e-mail with the following information, and we'll send you a quotation :

- product reference
- quantities
- delivery address

2) You can place an order directly on our website if you are not a professional.

A black and white photograph of a craftsman, likely a jeweler or metalworker, working on a piece of metal. The craftsman is wearing a light-colored, long-sleeved shirt and a dark cap. He is focused on his work, using a tool to shape a circular metal component that is mounted on a workbench. The component has a central hole and several smaller holes around its perimeter. The background is dark and out of focus, emphasizing the craftsman and his work.

The details are
perfection,
and perfection
is not a detail

Thank you for trusting us.

Bellerose.

Our projects

Benetti Yachts: Luxury & Italian Excellence

We take immense pride in our collaboration with one of the world's most renowned yacht manufacturers, Benetti Yachts. Throughout this project, we designed custom-made fans, specially constructed to withstand the impact of waves and stabilize the yacht's interior.

Four Seasons Resort

Nestled on Mexico's Baja California Peninsula, Four Seasons Marina Resort stands as an epitome of contemporary design.

We are delighted to have contributed to the interior design of this exceptional place.

Galleries Lafayette

We extend our heartfelt gratitude to Galleries Lafayette for placing their trust in us. Recently, we have collaborated with Galleries Lafayette Marseille to install our ceiling fans throughout the first floor of their store. The outcome is truly magnificent!

and more...

Sempre Life

We have embarked on a partnership with Sempre to share some of their projects worldwide. Our inaugural project took place at the Six Senses Hotel in Singapore.

Cook & Book Belgium

A renowned Belgian restaurant chain, offers a one-of-a-kind concept that combines food, music, and books, all under the same roof. They have chosen our ceiling fans for all of their establishments, entrusting us with the comfort of their clients. If you find yourself in Brussels, make sure to visit them and experience our fans.

Frédéric Nicolay - Interior designer

We are honored to have worked alongside Frédéric Nicolay, a distinguished interior designer based in Brussels, who has crafted around forty bars and restaurants in the city, including Le Belga, le Bar du Matin, le Potemkine, le Roi des Belges, Le Walvis, Le Robinet, and Le Jetser.
